Deco-Crete Revival is an opaque color coating that can be used to give a whole new look to any unsealed existing concrete surfaces. Revival will completely cover discolorations, stains, or any other blemishes that may be present. It may be used on interior or exterior, stamped, broomed, or swirl finished concrete along with other cementitious surfaces. Revival is formulated to match Deco-Crete's most popular Integral Color & Color Hardener Systems as well as a natural color similar to cured concrete.
